

THE TECH MUSEUM AWARDS

Technology Benefiting Humanity

PRESENTED BY APPLIED MATERIALS, INC.

About the Awards

The Tech Museum Awards honor innovators and visionaries from around the world who are applying technology to profoundly improve the human condition in the [categories](#) of education, equality, environment, health, and economic development. Individuals, for-profit companies, and not-for-profit organizations are eligible. The Tech Awards showcase their compelling [stories](#) and reward their brilliant accomplishments. The [purpose](#) of The Tech Awards program is to inspire future scientists, technologists, and dreamers to harness the incredible power and promise of technology to solve the challenges that confront us at the dawn of the 21st Century.

Technology Benefiting Humanity
Around the World...

Innovators protecting the environment today and for future generations.

Imbiber Beads® "Drain Protection Systems" are being honored by the United Nations and the Tech Museum of Innovation for their contribution to protecting the Environment.

Imbibitive Technologies America, Inc. has been selected as a Finalist in the Environment category for the 2003 Tech Museum Awards for its Imbiber Beads® "Drain Protection Systems".

Imbibitive Technologies America, Inc. was chosen as a Tech Laureate in the Environment category Award for its work from a field of 307 outstanding candidates, representing 50 countries. As per The Tech Museum of Innovation - "You represent the 'best of the best' technologists whose innovations benefit humanity, and we welcome you into our community of Tech Laureates".

One of the most pressing challenges of the new century is to harness the extraordinary force of technological innovation, spread it throughout the world, and make its benefits accessible and meaningful for all humanity... the true winners of these Awards are the many people who stand to benefit from the innovations the Awards are intended to recognize."

Kofi A. Annan
Secretary-General
United Nations
